

CRAMARO CRUSHED CAR SYSTEM

Cramaro introduces an inexpensive, simple to use, and reliable way to meet the D.O.T. law for transportation of crushed cars.

Cramaro's crushed car system has many key features specifically targeted by you and your fellow haulers:

- Lightweight system
- Operates from both sides quickly
- Won't flap, bind or snag on cars like curtain systems do
- Swing gates for maximum flexibility
- Bi-folding doors
- Heavy Duty framework for the front and rear bulkheads
- "Lock in place" mechanisms
- Quick and easy replacement of mesh containment tarps

With the **CCC** system there is no messing with cables, cranks, motors, or sliding curtains while operating. These items can fail and prevent you from earning your living. Our system is fast and easy to operate, and is based on a simple method of locking gates. It is almost fool proof.

Cramaro's lightweight swing gate style containment system is just the right thing to keep you and your trailer on the road making money. The kit includes the front and rear bulkhead, framework for the gates, all locking devices and safety straps, and heavy duty side containment tarps.
