

CRAMARO SIDE ROLL SYSTEMS

The **Cramaro Side Roll** System is fully waterproof, safe to operate and can be fitted to a variety of different types of trucks and trailers. **Cramaro** manufactures the Traditional Belt and Ratchet System as well as the Loc Rite System.

TRADITIONAL SYSTEM

The traditional side roll tarping system is a side to side operated system controlled at ground level via an elongated handle.

- Heavy duty vinyl or mesh tarp
- Heavy duty straps and ratchets to keep tarp taut and load waterproof
- Aluminum or Steel Bows (Optional)
- Lightweight aluminum/vinyl caps
- Steel or Aluminum extruded roll pipe available
- Custom applications

WASTE SIDE ROLL SYSTEM

(Top Picture)

This side to side tarp system is similar to the traditional system but is especially designed to meet the tarping needs for high cube waste trailers.

- Rugged, strong steel components
- No bows to remove, the system utilizes the center support beam
- Aluminum or Steel Bows (Optional)

LOC RITE™ SYSTEM

Operates like a traditional system, but is designed to cover quicker and easier.

- Unique roller does not require the use of ratchets
- Locks in place utilizing a deluxe crank handle
- Front and rear caps are standard
- Heavy Duty aluminum latch plate
- Aluminum, Steel or Flex Bows available
