

CRAMARO SRG FLIP SYSTEM

SRG Flip Systems are manufactured in America using **Steel Round Galvanized** heavy wall tubing for the arms. The system uses the popular spiral torsion spring. The **SRG** is available with four springs per side (up to 20' trucks) or with five springs (up to 28' trailers).

SRG COMES WITH:

- One piece arm, with upper arm (148 degree bend) insert
- Aluminum front universal roller and bearing plates
- Manual drive

OPTIONS INCLUDE:

- Aluminum Wind Deflector
- Electric Drive with Rocker Switch and Solenoid Kit
- Mesh, Vinyl or Asphalt Tarp

WHEN YOU BUY ANY CRAMARO FLIP SYSTEM YOU GET:

SAFETY:

- Quick and easy operation
- Ground control
