

CRAMARO WRAP 'N ROLL™

The **Wrap 'N Roll™** Side Roll Tarp System for Side Dump trailers is an all aluminum electric system which utilizes many of the same components from the Flip'N Go System. The springs, aluminum arm extrusions and the motor are all inter-changeable. With the push of a button, the system easily clears heaped loads because of the straight arm design. The roll pipe tucks under the top rail of the trailer in both the systems open and closed positions. The **Rhino Mesh** tarp does not drag over the load. The weight of the system is under 300 pounds.

Roll Pipe and Arms:

- Strongest Pipe available
- 2 lengths for shipping with a 3' center joiner piece
- Because of the design, there is very little sag in the center
- Diamond Shaped Aluminum arms are the strongest in the Industry

Motor:

- 2.1 Horsepower 90: 1 Worm Drive American Made Motor
- Motor has a full One year warranty
- Electric Kit includes all loom clamps, connectors, breakers, solinoid, rocker switch, 6 gauge wire and heavy duty trailer connectors, etc

Tarpaulin:

- Tarp is constructed from Cramaro **Rhino Mesh**
- Tarp is seatbelt reinforced around the perimeter
- Tarp also has two lateral reinforcements to prevent stretching
- This assists in the smooth and even rolling of the tarp

The **Wrap 'N Roll™** Side Roll System is completely out of the way when dumping your load from either side of the Trailer.
