

DESIGN

- Specifically manufactured for trash transfers, open top trailers, and sawdust/bark mulch trailers
- Fleet tested and proven durability in all climates
- Completely covers all four sides of trailer for total containment of load
- Innovative cable system slides the tarp over the load
- No bows to remove at the top of the trailer
- Clears heaped loads with 18" high rear bow

QUALITY

- Low profile front assembly
- Aircraft steel galvanized cable for durability (stainless optional)
- Sealed bearing rear pulley assembly

SAFETY

- Ground control operation
- No injuries mean no workers' comp. claims

SERVICE

- Over 25 years of engineering excellence behind our products
- Toll-free, no hassle calling and tech support

CTS™: The perfect solution in tarping your trash transfer or open top trailer. The ease of a sliding cable system and the safety of complete ground control. Let the **Cramaro Trash System** save you time and make you more money, today!

- Patented dual action spring in rear bow mechanism, folds forward to the front for loading and folds over the tailgate for transport
- Ratchets along sides lock the tarp firmly over top rail
- 97% of trailer available for loading when system is open
- Manual ground control crank assembly
- Does not increase the height of the trailer

- Ground control chain drive with fold away crank handle
- Raschel knit mesh tarp with heavy duty vinyl reinforcement

- No need for climbing
- No overhead wire worries due to no flip arms

- Replacement parts ready to ship
- 1 year warranty
